

Abstract

- 5 The present invention provides dye preparations comprising, each percentage being based
on the weight of the preparation,
- 10 a) from 0.1% to 30% by weight of one or more anthraquinone, quinophthalone or azo
dyes which are free of ionic groups as a component (A),
b) from 0.1% to 20% by weight of a dispersant based on a naphthalenesulfonic acid-
formaldehyde condensation product having an average molecular weight of at least
11 000 g/mol, as a component (B),
c) from 0.1% to 90% by weight of one or more mono- or polyhydric alcohols as a
component (C),
15 d) from 0% to 5% by weight of customary assistants as a component (D), and
e) optionally water ad 100% by weight.
